PRICE ONE CENT.

NEW YORK, WEDNESDAY, MARCH 25, 1891.

PRICE ONE CENT.

Repeated His Easy Victory on the Hill Track.

MANY OLD TIMERS PRESENT

Jed Was a Good Thing and Won His Backers a Big Pile.

GUTTENBURG RACK TRACK, March 28. -- The weather was all that could be desired for rac. ing to-day. It was mild and springlike, and a large crowd was the natural result. Old-timers who remained in seclusion all Winter ventured out to-day, and there was a plential springling of them about the paudock.

The track was very much improved over ye terday, though still stiff and holding. It had dried out in spots and was in very fair condition. The programme was a fair one, with very few scratones.

The first race contained a poor lot. Oarsman opened the favorite and remained so. Ella H. gelding, who was second choice at the close gelding, who was second choice at the close opened at 10 to 1 and was backed down as though it was all over but the cashing of the tickets.

Marty B. was third choice and was well played, as also was Haymond. Marty B. won naudily from Kaymond, who had to neht hard to beat Girondes, a long shot, for the place. The Elia ht, gelding got away very bauly but 50 and a close fourth.

The Ella h, gelding got away very badly but fin-shed a close fourth.

Harrisburg was a hot favorite for the second roce on account of his easy race yesterday. His backers were rewarded for their confidence, for he won easily. Anomaly was second choice and he was second at the finish.

Ozone was third choice but was not heavily backed, save 1, 2 and 3, and he finished third, hone of the others were played to any extent, save Mursu Redon.

Dalsyrian was an overwhelming favorite for the third race at odds on. Shrewd ones, however played Jen to beat him, and they got all the money at good odds.

the money at good odds, Jed won rather easily. Virgle at 5 to 1 for the place just beat the favorite out for that position. FIRST RACE.

Weigits, 20 pounds above the scale; selling allowances: ave forlongs.

"Y. & S." silck Licerice

Ruttinger's Bro her-in-Law's Alleged Double Caught in New Hampshire.

Says He Never Heard of Either Wright or Ruttinger.

Levy and Sumner's Queer Inquest

on the Astor House Suicide Continued.

INTECIAL TO THE EVENING WORLD.1 EAST WAREFIELD, N. H., March 25 .- Sheriff Parenley, of Rochester, N. H., arrived here at 12.30 to-day and arrested James Gall Ham liton Allen, the young Englishman or Scotchcontinued at the American Institute Building man who made his appearance at Rochester, to-day, and the prices realized were better on Feb. 25, and who is suspected by the Rochester authorities of being William Wright,

The formal charge against the young man is

when pressed further, William Hamilton Edgerton, and still again William Allen Ham

He said he left Glasgow the latter part o November and arrived at Boston on the Allan steamship Pomeranian about Dec. 12. He had \$120 in money, which he spent during a six weeks' stay in Boston. He knew Taomas Cushing, the son of the senior partner

of the Boston firm of Cushing & Sherman. Through a man by the name of Jennings, whom he met in Glasgow, he corrowed money from young Cushing, and being unable to pay it, he left Boston for Portland.

He had no money, and so kept shifting his residence till he finally reached East Wakefield, where he was arrested. He broke down and cried like a baby when Omcer Willy laid his hands upon him. He called him William Wright, which caused

him to start in surprise. He said that he had never heard of William Wright, the supposed suicide in the Astor House, New York, or of Fred Evans, the name under which the suicide registered. When the name Rutunger was mentioned to him he said he did not know such a man. He

says he has never been in New York, veterinary surgeon in Gissgow. He is not sure he is there now, for just before he left Giasgow his brother was thinking of leaving Meinourne, Australia, where his mother and two sisters reside.

He has written to him for money and received no answer. He has worked in Glasgow as steward. He was taken to Rochester under police escort.

The theory of the Rochester authorities in that Alien is merely an alias and that the man is really william Wright. If he is William Wright they will send him to New York on a charge of having murdered Ruttinger at Tottenville, sometime after Feb. 2 lagt.

The prisoner is a man of about twenty-eight, The Mayor ordered poles and wires cut down 5 feet 6 lockes in height, weighing about 150 right and left, a ninety days' notice for their pounds. He has light hair and complexion and a light mustache.

He is the young man who on Feb. 25 went to neer Kearney, of the Board, and, as his report Farmer Trickey's house in Rochester and ap-

the envineer with helpg controlled by the wes-tern Union Telegraph and the Telephone Com-He always said his name was James Gail Hamilton Allen, and gave out that he came and liquor here as representative of his brother, who was an importer of chemicals in Germany. One of the lucidents which makes Mr.

Tricker think his guest was connected with the Staten Island mystery is that he once tied a boy's hands as Kuttinger's body was tied when the Staten Island mystery is that he once tied a wares from \$55 a month 10 \$2 a day. They work seven days a week. The petition was referred to Supt. Parsons for a statement. found at Tottenville.

DOVER. N. H., March 25. -It is believed here that the mysterious young man who recently stopped in Rochester under the name of James Gail Hamilton Allen, was not William Wright, the alleged murderer of Carl Ruttinger, as has seen intimated in the newspapers.

He is said to be a young Scotchman, who came to Boston several weeks ago, and who, according to reports, has succeeded in swindling various persons out of board and money. Previous to going to Rochester he stopped nearly three weeks at Mrs. Crocker's house n South Berwick, Me.

He claimed to be in business with the United States Druggist Supply Company of Boston, but this is denied by Mr. Cushing, of that con cern, who says he and his son and one of his clerks were swindled by the stranger. He was introduced to them as an officer in the English army on leave of ausence and went by the name of J. W. Allen.

Nob., and a number of pas-engers killed.

No details are yet received.

Deaths from the Grip.

Two more deaths from La Grippe were reported to-day. The poince sick-list numbers 173.

Discussed Before the Assembly Committee on Railroads Yesterday.

Assemblyman Byrne Makes a Bitter, Fight Against It.

Mr. Sulzer's Able Argument Showing Why It Should Be Passed.

The Grand Jury Still at Work on the Tunnel Disaster of Feb. 20.

[SPECIAL TO THE EVENING WORLD, I ALBANY, March 25.—Assem lyman Sulzer's bill to ventilate and light the Fourth

Phoneix of Armona sold up from 39 to 45, and natural ventilation is insufficient to remove

sophy of bills.

Compiroller Myers to-day awarded \$1,280,000 at 200 per cent. Dock bonds and \$139,564 School bonds at \$101,045 a \$102.475.

The Trea-ury Department to-day purchased 129,000 ownces of silver at 98,10 a 98, 125.

The total sales at the New York block Exchange to-day were 105,400 snares of listed stocks and 30,000 ownces of silver.

That this condition of sflairs has existed for more than ten years, and that for that length of time it has been known to the management of the New York Central road has been positively proven; for on Sept. 22, 1882, a col-

of time it has been known to the management of the New York Central road has been positively proven; for on Sept. 22, 1882, a collision took place in the tunnel causing loss of life.

Careful investigation was made at that time by both the Coroner's Jury and after it by the Grand Jury of New York Central alload and the presentment made to the fest, that the accident was cause through and lighted, and that the New York Central that it is a popular measure. They see no reason why the New York Central Railroad should throw so many obtaineds in the way of making the tunnel safe, especially as it can be made safe. Other tunnels have seen made safe.

The people of New York want the tunnel to be ventilated and lighted. It is a popular measure. They see no reason why the New York conducted by gentlemen, and they can have a lease of Jerome Park in conducted by gentlemen, and they can have a lease of Jerome Park for one, five or they can have a lease of Jerome Park in conducted by gentlemen, and they can have a lease of Jerome Park in conducted by gentlemen, and they can have a lease of Jerome Park in ink as a lease of Jerome Park in conducted by can have a lease of Jerome Park in conducted by can have a lease of Jerome Park in conducted by can have a lease of Jerome Park in conducted by can have a lease of Jerome Park in conducted by can have a lease of Jerome Park in conducted by can have a lease of Jerome Park in conducted by can have a lease of Jerome Park in conducted by can have a lease of Jerome Park in conducted by can have a lease of Jerome Park in conducted by can have a lease of Jerome Park in conducted by the opposite to the Leg slature for The objection has been made that Jerome Park in conducted by the opposite to the Leg slature for the variation has the province of the tunnel and have a lease of Jerome Park in conducted by leave and the province of the park in conducted by the park in the province of the park in the provin

and lighted, and that the New York Central Railroad management was responsible for the deaths of the people killed at that time.

The Grand Jary in its presentment directed that means be taken to light and ventilate the tunnel in order that similar accidents might not happen in the future.

The New York Central Railroad in spite of this warning has since that time done absoling nothing to make its tunnel safer.

On the 20th of February, 1891, an accident, more serious than the one of Sept. 22, 1883, occurred in the tunnel, within 200 feet of where the former collision had taken place. In this latter accident six lives were tost, and since this last desaster, and in spite of the two warnings, not one single thing has been done to remedy the defects in the tunnel. And the New York Central Railroad, through its President, announced that it did not propose to make the tunnel light until directed to do so make the tunnel light until directed to do so make the tunnel light until directed to do so make the tunnel light until directed to do so make the tunnel light until directed to do so make the tunnel light until directed to do so make the tunnel light until directed to do so make the tunnel light until directed to do so make the tunnel light until directed to do so make the tunnel light until directed to do so make the tunnel light until directed to do so make the tunnel light until directed to do so the serior of the state of New York.

The San dither been more people in the sangerous as it was ten years ago, and the New York Central Railroad, the safer.

The sin of antire the tunnel is as dangerous as it was ten years ago, and the New York Central Railroad, the safer.

The sin of antire to see it see an absolutely with the Board of the south the safer of necessity. Four hunsers and fifteen transported to the safer of necessity. Four hunsers and fifteen transported to the safer of necessity. Four hunsers and fifteen transported to the safer of necessity. Four hunsers and fifteen transported to the safer of necessi by the Legislature of the State of New York, and if the Legislature decided that they should light the tunnel the New York Central Rall-

road was willing to light it. Mr. Depew probably means by this the string ing of electric lights through the tunnel, a very simple operation and an operation which he stated before the Coroner's jury could be done

very cheaply. CET FIRST BE VENTILATED. But lighting the tunnel does not mean merely the placing of lights within it. It means rid- the Grand Jury this morning. ding the tunnel of smoke, steam, ashes, dust and cinders and all other atmospheric impuri-ties, the existence of which renders it impos-the investigation was officially resumed. sible to see lights were lights there.

HEASONS FOR VENILATING AND LIGHTING.

Central Railroad to ventilating and lighting the tunnel are that electric lights would blind the entitieers and make the number of accidents more. This is not true. The Hoosac Tunnel is lighted, and Mr. Edison and the best electrical entitles at a railroad engineers all say that tunnels can be lighted with safety. The New York Central says that if it lights the tunnel engineers cuntot see their signal lights some through, short of the time they can't see toem now without the tunnel being lighted. The New York Central says that for ten years it has be in rying to ventilate the tunnel by opening more of it on Fourth avenue, but that the city has no right to render Fourth avenue worse than it is at present. There are too many openings from the tunnel into it now. Horse's are frightened daily by the ir ins, and the lives of their drivers and of wayfarers are continually endangered. And the smoke, steam and dust that are beloned forth render the avenue smoot uninhabitable. Mr. Channeey Depew, when asked at the Coroner's inquest, if stopping the trains north of the Harlem River would not relieve the tonnel, said: "Yes and it would relieve the New York Central Hallroal of 30 per cent. of its revenue."

tomel, said: "Y's: and it would relieve the New York Central Hallroa 10 50 per cent. of its revenue."

The annual revenue of the New York Central Railroa' is \$11,500,000. Thirty per cent. of this is \$3,500,000. 30. The proper tigning and ventual n. of the Fourth Avenue Tunnel is said by the best engineers to body a matter of expense. It travelling through it is worth to the New York Central Railroas \$3,500,000, a small portion of this money might be expended in making the tunnel sais. for the people who ride through this company.

The New York Central Railroad received last year in rental from the New York, New Haven and Harttord Railroat, or the privilege of coming over its tracks into the Grand Central Deacot, the sum of \$550,000. A small portion of this sum of money would more than pay for making the tunnel safe.

tee on Railroads restering atternoon. Assemblyman Waiter G. Byrne, a member of the Committee, bitterly opposed it. Mr. Sulzer gave excellent reasons way the Committee should report favorably. In executive session Mr. Byrne also fought against the buil, and out of courtesy to him the Committee leid it over until next Tuesday. Mr. Sulzer's argument was substantially as follows:

"The Fourth Avenue Tunnel has been dangerons ever since it was closed over. There is no artificial method of ventuating, and the natural ventilation is insufficient to remove of which is test than \$5,000... and the position of the particular properties of the position of the particular properties of the position of the particular properties of the particular properties of the particular properties o THE QUESTION NARROWED DOWN.

to playing tips and not following their system.

can't, and they are looking upon you, their representatives, to make this needed reforms IN THE GRAND JURY ROOM.

Investigation of the Tunnel Disaster Going On To-Day. The investigation into the causes of the ter

rible Fourth Avenue Tunnel disaster, in which

six people lost their lives, was continued by It was 11.15 when District-Attorney Nicoli In the ante-room at this time there Until the tunnel is ventilated it cannot be were comparatively few witnesses, among them lignied; in order to be lighted it must be venti- being Dr. William A. Conway, the Coroner's physician who examined the bodies of the

freman, that neither of them saw the shop train until their locomotive had crashed into it, of the taled "shop" train; Engineer Reilly, which were quariered at the track. Included the track is ally, he would quite a sum on Harrisburg's victory. no matter if all the signals had been out of Wellington, of the New Haven train, order, the engineer of the New Haven local that crashed into the "shop" train; Assistant train could have seen the shop train ahead of Division Superintendent Schoffeld, of the New

operator at Eighty-sixth street. operator at highly-ailth aireel.

And it is absolutely apparent and a positive fact, indeed, that it was the darkness of the banks Coroner Levy, but the Coroner's Jury his disaster and loss of life.

The testimony obtained from men working in the tunel, and from charmers, shows it is the common than the common men working in the tunel, and from charmers, shows list.

Thomas Lynch, the inventor crank, who has been hanging around the Grand Jury room aince the investigation began, The reasons wy toe tunnel should be venti-lated an lighest are those:

Two terribic accidents have occurred in it created considerable excitement this owing to the darkness and gloom.

That the ligual statem is by no means perturbed door leading into the Grand Jury's room That trains run through it at different rates of speed, their engineers unable to see abread of them.

That in parts of the tunnel engineers cannot see the smokestacks of their engine ahead of them.

That the book system is not relative, twins to the fact that in men in the signal stations can take the clock by incerting their engine.

At lackock the Grand Jury a room in the way spee ity warned by the doorman to ke paule or the would be ejected.

At lackock the Grand Jury and dorman to the may. To morrow in y all adjournment of the may. To morrow in y all adjournment is the case the clock by incerting their ed peacetis into an entures at the levers, and that this is continually note.
